

**SKIN X PERT** facilitates precise, scientific skin diagnosis. SKIN X PERT identifies individual homecare and professional treatment based on the status of the skin. The program is interactive, incorporating 4 diagnostic tools including skin scopes. Images of the skin are included in the consultation report as well as being saved to disk for future comparisons and/or treatment verification.

### STEP 1

Welcome to SKIN X PERT.

Your personal details are insert into the client database.

### STEP 2

Customer Management

Each photo of your skin will be inserted by the dates of their visits. This will help you to see the changes your skin condition all at once.

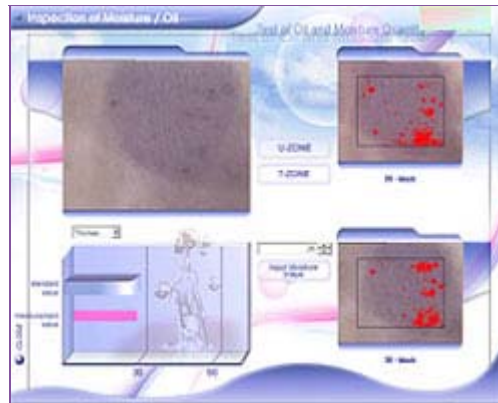

### STEP 3

Concentrated Management

Each photo of your customer's skin will be inserted by the dates of their visits. This will help you to see the changes in their skins condition all at once.

#### STEP 4

#### Oil and Moisture Measurement

The program measures the oil and moisture content of the skin.

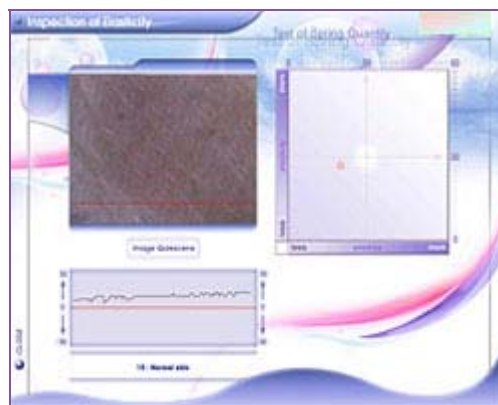

#### STEP 5

#### Skin Pore Measurement and Observations

The program magnifies the skin by 160 times to reveal pore size, keratinisation, breakout, dark circles, pigmentation etc.

#### STEP 6

#### Elasticity and Hydration Levels

The program determines the depth of wrinkles based on the elasticity levels and hydration levels based on moisture content. Also takes into account, age,

sex and season to produce an accurate reading.

### STEP 7

### Intensive Inspection and Screen Division

The screen is divided into 2 or 4 images giving you the ability to compare one image or the skin to another.

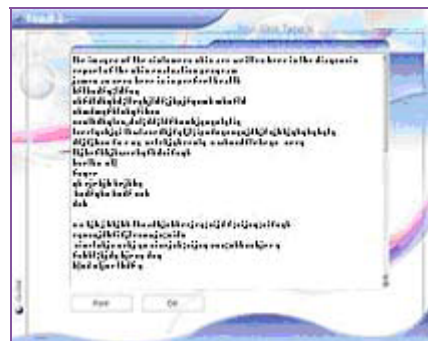

### STEP 8

### Result Out-put

The program generates the result of the analysis into two easy to understand graphs. These results are compared to how the skin condition should be.

### STEP 9

### Product and Treatment Report

Based on the individual skin diagnosis, SKIN X PERT produces a written report detailing homecare and professional treatment suggestions.

### **How can SKIN X PERT benefit your salon?**

- **A scientific report on your skin status**
- **Photographic evidence of improvement from treatment to treatment**
- **An understanding of your individual skin condition**
- **Homecare product recommendation specific to your individual needs**
- **A treatment schedule designed to achieve the best possible results**
- **A clear idea of how you shall achieve your expectations.**
